| The Problem

Supply chain failures cost the average enterprise **\$100M-\$300M annually** — yet diagnosis still takes 8-12 weeks and \$150K-\$500K in consulting fees. The Supply Chain Health Agent delivers in 60 seconds what traditionally takes 12 weeks.

Alternative	Cost	Time to Insight	Live Data	Always On
McKinsey / Big 4	\$150K-\$500K	8-12 weeks	No	No
Gartner Membership	\$25K-\$60K/yr	Weeks	No	No
Internal Team	\$30K-\$80K	4-8 weeks	No	No
ASCM Free Tool	\$0	1 hour	No	No
SC Health Agent	See tiers	60 seconds	Yes	Yes

| What It Does

Evaluates your supply chain across 8 SCOR-aligned domains, benchmarks performance against **2026 world-class standards**, autonomously searches for live market intelligence, and delivers a prioritised assessment with actionable recommendations — all in under 60 seconds.

Capability	What It Does
Instant Diagnostics	Scores 8 domains 0-100 vs 2026 Gartner/SCOR benchmarks — cited inline
North Star Framing	Your 2-year excellence vision frames every recommendation
Live Market Intelligence	Autonomously searches freight rates, regulatory updates, geopolitical risks
Geopolitical Risk Assessment	Scores China/rare-earth exposure and nearshore vs reshore strategy
Cyber Resilience Scoring	Named sub-dimension in Risk — AI-enabled attacks and digital vulnerabilities
Auto Action Pack	Generates board summary, 90-day plan and risk watch list automatically
Context-Aware Q&A	Follow-up answers reference your specific scores — not generic advice
Professional PDF Export	Multi-page report with scores, narrative, recommendations — board-ready
Phase 2 Risk Alerts	Proactive risk monitoring via Claude + web search, to Slack and email

New in v4.1 — REWIRED + 2026: North Star intake · Benchmark transparency · Geopolitical and sourcing footprint questions · Cyber resilience sub-dimension · 2026 benchmarks across all 8 domains · Model fallback chain

| Five User Personas

SC MANAGER / ANALYST

Practitioner Track — Live Now

Deep KPI diagnostics across all 8 SCOR domains. Benchmark gaps vs 2026 Gartner Top 25. Cost-benefit analysis. Follow-up Q&A with live web search.

CSCO / COO / VP SC

Executive Track — Live Now

Strategic scenario comparison — 3 named paths with trade-offs and KPI targets. 36-month phased maturity roadmap. Board-ready language throughout.

SC CONSULTANT

Consultant Track — Live Now

Multi-client diagnostics across all 11 verticals. White-label PDF reports. Client intake forms. Side-by-side client comparison.

ENTERPRISE IT / CONFIG

Enterprise Track — Phase 2

SSO / SAML authentication. API access and webhooks. Custom vertical definitions. Audit logs, admin panel, SLA guarantee. On-premise deployment.

GOVERNMENT / FEDERAL

Federal Track — Phase 3

Air-gapped and GovCloud AWS deployment. FedRAMP authorization pathway. ITAR controls and FIPS 140-2 compliance. Federal SI partner model.

| 8 Health Domains — 2026 World-Class Benchmarks

80-100 Excellent **60-79 Good** **40-59 Fair** **0-39 At Risk** Every score cites its world-class benchmark inline.

Domain	Key KPIs / Sub-Dimensions	2026 World-Class
Demand Planning & Forecasting	Forecast accuracy, MAPE, S&OP maturity	FA 85-90%+, MAPE <10%
Procurement & Sourcing	Supplier OTD, PPM, nearshoring strategy	OTD 95%+, <500 PPM
Manufacturing & Production	OEE, first-pass yield, schedule adherence	OEE 85%+, FPY 98%+
Inventory Management	Turns, stockout rate, E&O%, cash-to-cash	8-12x turns, <1% stockout
Logistics & Transportation	OTIF, freight cost %, perfect order rate	OTIF 95-98%
Warehousing & Fulfillment	Order accuracy, utilisation, lines/hour	Accuracy 99.9%+
Risk & Resilience	BCP, TTR, rare-earth exposure, cyber resilience	BCP 95%+ critical nodes
Sustainability & ESG	Scope 3 tracking, ESG audit coverage	Scope 3 80%+ tracked

2026 Context: China controls ~70% of rare-earth processing — geopolitical exposure now scored explicitly. Trucking capacity crunch driving 10%+ rate hikes. 70% of enterprises report advanced AI adoption (Prologis 2025). AI-enabled cyber attacks on supply chains are a top-tier board-level risk.

| 11 Industry Verticals

Vertical	Focus Areas	Reference Orgs
General Manufacturing	Standard SCOR + Gartner benchmarks	Gartner Top 25
Semiconductor	Fab utilisation, CHIPS Act, rare earth risk	TSMC, Intel, NVIDIA
Automotive	JIT/JIS delivery, EV transition readiness	Toyota, BMW, Tesla
Pharmaceutical	Cold chain, GDP compliance, DSCSA	Pfizer, Roche, J&J
Retail & E-commerce	OTIF, last-mile, omnichannel, seasonal peaks	Amazon, Walmart, Zara
Consumer Packaged Goods	Case fill rate, trade promotion, ESG	P&G, Unilever, Nestle
Aerospace & Defense	AS9100D, long-lead parts, ITAR/EAR controls	Boeing, Airbus, Lockheed
Healthcare	UDI traceability, sterile supply, GPO	Medtronic, Stryker, BD
Food & Beverage	FSMA compliance, cold chain, shelf-life	Nestle, Coca-Cola, Tyson
Technology & Electronics	Short lifecycles, component obsolescence, NPI	Apple, Samsung, Dell
Apparel & Fashion	Seasonal cycles, fast fashion, EPR compliance	Zara, Nike, H&M

| Phase 2 — Enterprise Infrastructure (Built & Ready)

Phase 2 infrastructure is fully built and ready for activation. Available to self-hosters today — unlocked on the hosted service by tier.

Capability	What It Does	Tier
Cross-Session Memory	SQLite engine tracking org profiles, scores, KPI trends	Pro+
Proactive Risk Alerts	Claude + web search scans for live risks before you ask	Pro+
Slack Integration	Push assessments, action plans, risk alerts to channels	Pro+
Email Dispatcher	Branded HTML email reports with domain scores and alerts	Pro+
Jira Integration	Create tickets from 90-day action plan automatically	Team+
Feature Flags	60+ features gated across 6 tiers, pricing never in code	All

| Open Source vs Hosted Tiers

The code is MIT — free forever. The hosted service is where advanced features live.

Feature	Open Source	Hosted Free	Pro	Team	Ent.	Gov
Core assessment (8 domains)	Yes	Yes	Yes	Yes	Yes	Yes
All 11 verticals	Yes	Yes	Yes	Yes	Yes	Yes
PDF export	Yes	Yes	Yes	Yes	Yes	Yes
North Star + Benchmark + Geo + Cyber (v4.1)	Yes	Yes	Yes	Yes	Yes	Yes
Assessments / month	Unlimited	3/mo	Unltd.	Unltd.	Unltd.	Unltd.
Cross-session memory	Self	-	Pro+	Pro+	Pro+	Pro+
Proactive risk alerts	Self	-	Pro+	Pro+	Pro+	Pro+
Slack + Email delivery	Self	-	Pro+	Pro+	Pro+	Pro+
Jira / White-label / API	Self	-	-	Team+	Team+	Team+
SSO / SAML / FedRAMP	-	-	-	-	Ent+	Gov

| Getting Started — Three Steps

1 Open	2 Select	3 Assess
Go to supply-chain-health-agent.streamlit.app - no login, no download, no IT ticket.	Choose your persona and vertical. Share your North Star vision and org context.	Click Run Assessment. Claude searches the web and delivers full results in under 60 seconds.

| Built on McKinsey REWIRED Principles

v4.1 incorporates four evidence-based principles from McKinsey's REWIRED framework, applied directly to how the tool diagnoses and guides supply chain transformation.

REWIRED Principle	How It's Applied in v4.1	Tier
Tie every output to business value	Every score cites its world-class benchmark and gap inline	Free
North Star vision before roadmap	Frames all recommendations against your 2-year supply chain vision	Free
Sequenced 3-horizon roadmap	Pro Action Pack: 0-90 days / 90 days-12 months / 12-36 months	Pro
Financial impact of every gap	Dollar cost of each SCOR gap sized against your revenue and COGS	Pro

| Grounded in 2026 Global Supply Chain Reality

Every benchmark, trend note, and risk flag is updated to reflect the current global environment.

2026 Development	Impact on Scores & Recommendations
China rare-earth controls	~70% of rare-earth processing is China-controlled. Exposure now scored in Risk and Procurement. Critical for auto, defense, semiconductor, and clean energy verticals.
Logistics capacity crunch	Double-digit (10%+) freight rate hikes in 2026. Logistics benchmarks raised. Carrier diversification is now a best-practice signal.
AI-as-operator	70% of enterprises report advanced AI adoption (Prologis 2025). Experimenting is no longer advanced — agentic AI in live operations is the 2026 bar.
Nearshoring / reshoring	40% of US companies relocating supply chains to North America by 2026 (Deloitte). Sourcing footprint strategy is now a scored intake question.
Supply chain cyber risk	AI-enabled attacks automate supplier impersonation and manipulate forecasting data. Cyber resilience is a named, scored sub-dimension of Risk.
Sustainability mandate	EU CSDDD fines up to 5% of global revenue. 85% of corporations maintaining or increasing sustainability spend (MIT 2025).
