Time to Assessment	SCOR Domains	Industry Verticals	User Personas	AI-Native Access	Open Source MIT

| The Problem

Supply chain failures cost the average enterprise \$100M–\$300M annually — yet diagnosis still takes 8–12 weeks and \$150K–\$500K in consulting fees. The Supply Chain Health Agent delivers in 60 seconds what traditionally takes 12 weeks — browser-based, no technical setup required.

Alternative	Cost	Time to Insight	Live Data	Always On
McKinsey / Big 4	\$150K–\$500K	8–12 weeks	No	No
Gartner Membership	\$25K–\$60K/yr	Weeks	No	No
Internal Team	\$30K–\$80K	4–8 weeks	No	No
ASCM Free Tool	\$0	1 hour	No	No
SC Health Agent	See tiers	60 seconds	Yes	Yes

| What It Does

Evaluates your supply chain across 8 SCOR-aligned domains, benchmarks performance against 2026 world-class standards, autonomously searches for live market intelligence, and delivers a prioritised assessment with actionable recommendations — all in under 60 seconds.

Capability	What It Does
Instant Diagnostics	Scores 8 domains 0–100 vs 2026 Gartner and SCOR benchmarks
Live Market Intelligence	Autonomously searches for freight rates, regulatory updates, geopolitical risks
Auto Action Pack	Generates board summary, 90-day plan and risk watch list automatically
Context-Aware Q&A	Follow-up answers reference your specific scores — not generic advice
Professional PDF Export	Multi-page report with scores, narrative, and recommendations — board-ready
Phase 2 Risk Alerts	Proactive risk monitoring via Claude + web search, delivered to Slack and email

| Five User Personas

SC MANAGER / ANALYST

Practitioner Track — Live Now

Deep KPI diagnostics across all 8 SCOR domains. Custom assessment mode — describe your org, get tailored scores. Benchmark gaps vs 2026 Gartner Top 25. Cost-benefit analysis with your real financial figures. Follow-up Q&A with live web search.

CSCO / COO / VP SC

Executive Track — Live Now

Strategic scenario comparison — 3 named paths with trade-offs, investment ranges, and KPI targets. 36-month phased maturity roadmap. Board-ready language throughout. Customisable orientation: growth-first vs cost-out vs balanced.

SC CONSULTANT

Consultant Track — Live Now

Assess any client across all 11 industry verticals. Cost-benefit analysis included in every assessment output. Follow-up Q&A with live web search for current market data.

ENTERPRISE IT / CONFIG

Enterprise Track — Phase 2

SSO / SAML authentication. API access and webhook integrations. Custom vertical definitions and branded outputs. Audit logs, admin panel, SLA guarantee. On-premise deployment option.

GOVERNMENT / FEDERAL

Federal Track — Phase 3

Air-gapped and GovCloud AWS deployment. FedRAMP authorization pathway. ITAR controls and FIPS 140-2 compliance. Classified mode with dedicated infrastructure. Federal SI partner model.

| 8 Health Domains Assessed

80–100 Excellent 60–79 Good 40–59 Fair 0–39 At Risk

Domain	Key KPIs	World-Class Target
Demand Planning & Forecasting	Forecast accuracy, MAPE, S&OP maturity	FA 85–90%+, MAPE <10%
Procurement & Sourcing	Supplier OTD, spend under management, PPM	OTD 95%+, <500 PPM
Manufacturing & Production	OEE, first-pass yield, schedule adherence	OEE 85%+, FPY 98%+
Inventory Management	Turns, stockout rate, E&O%, cash-to-cash	8–12x turns, <1% stockout
Logistics & Transportation	OTIF, freight cost %, perfect order rate	OTIF 95–98%
Warehousing & Fulfillment	Order accuracy, utilisation, lines/hour	Accuracy 99.9%+
Risk & Resilience	BCP coverage, TTR, supplier risk tiers	BCP 95%+ critical nodes
Sustainability & ESG	Scope 3 tracking, ESG audit coverage	Scope 3 80%+ tracked

| 11 Industry Verticals

Vertical	Focus Areas	Reference Orgs
General Manufacturing	Standard SCOR + Gartner benchmarks	Gartner Top 25
Semiconductor	Fab utilisation, CHIPS Act, rare earth risk	TSMC, Intel, NVIDIA
Automotive	JIT/JIS delivery, EV transition readiness	Toyota, BMW, Tesla
Pharmaceutical	Cold chain, GDP compliance, DSCSA	Pfizer, Roche, J&J
Retail & E-commerce	OTIF, last-mile, omnichannel, seasonal peaks	Amazon, Walmart, Zara
Consumer Packaged Goods	Case fill rate, trade promotion, ESG	P&G, Unilever, Nestlé
Aerospace & Defense	AS9100D, long-lead parts, ITAR/EAR controls	Boeing, Airbus, Lockheed
Healthcare	UDI traceability, sterile supply chain, GPO	Medtronic, Stryker, BD
Food & Beverage	FSMA compliance, cold chain, shelf-life	Nestlé, Coca-Cola, Tyson
Technology & Electronics	Short lifecycles, component obsolescence, NPI	Apple, Samsung, Dell
Apparel & Fashion	Seasonal cycles, fast fashion, EPR compliance	Zara, Nike, H&M

| Phase 2 — Enterprise Infrastructure (Built & Ready)

Phase 2 infrastructure is fully built and ready for activation. Available to self-hosters today — unlocked on the hosted service by tier.

Capability	What It Does	Tier
Cross-Session Memory	SQLite engine — tracks org profiles, scores, KPI trends over time	Pro+
Proactive Risk Alerts	Claude + web search scans for live risks before you ask	Pro+
Slack Integration	Push assessments, action plans, risk alerts to channels	Pro+
Email Dispatcher	Branded HTML email reports with domain scores and risk alerts	Pro+
Jira Integration	Create tickets from 90-day action plan automatically	Team+
Feature Flags	60+ features gated across 6 tiers without pricing in code	All

| Open Source vs Hosted Tiers

The code is MIT — free forever. The hosted service is where advanced features live.

Feature	Open Source	Hosted Free	Pro	Team	Ent.	Gov
Core assessment (8 domains)	Yes	Yes	Yes	Yes	Yes	Yes
All 11 verticals	Yes	Yes	Yes	Yes	Yes	Yes
PDF export	Yes	Yes	Yes	Yes	Yes	Yes
