Benchmarks
Updated

01 — The Challenge

Supply chain failures are costing enterprises more than ever — and risks are accelerating

Supply chain underperformance costs enterprises \$100M–\$300M annually

\$182M

avg. annual loss per
Fortune 500 from disruptions
(McKinsey, 2025)

12 wks

avg. time for a
consulting-led supply
chain diagnostic

\$300K

avg. consulting cost
for a full-scope
health assessment

70%

of companies now report
advanced AI adoption
(Prologis, 2025)

Domain	World-class 2026	Industry Avg	Annual Gap
OTIF	95–98%	85–88%	~\$12M/yr in penalties & premium freight
Inventory Turns	8–12x	4–5x	~\$40M trapped per \$200M inventory
Forecast Accuracy	85–90%	60–70%	25–35% excess safety stock cost
OEE	>85%	60–65%	~\$18M lost output per \$100M capacity

2026 supply chain landscape — geopolitical, structural, and digital risks converging

China Rare-Earth Controls

China controls ~70% of rare-earth processing. Export restrictions since April 2025 are forcing auto, defense, and semiconductor supply chains to actively de-risk and diversify.

Logistics Capacity Crunch

Shrinking trucking and ocean capacity is driving double-digit (10%+) freight rate hikes in 2026. Warehouse utilization is reaching expansionary levels globally.

AI-as-Operator

AI is transitioning from advisor to operator — agents now execute routine ordering, routing, and rebalancing. 70% of enterprises report advanced AI adoption (Prologis 2025).

Nearshoring / Reshoring

40% of US companies are relocating supply chains to North America by 2026 (Deloitte). USMCA friendshoring is accelerating across auto, electronics, and CPG.

Supply Chain Cyber Risk

AI-enabled attacks automate supplier impersonation and manipulate forecasting data. JLR cyberattack (2025) shut operations across multiple continents.

Sustainability Mandate

EU CSDDD fines up to 5% of global revenue. 85% of corporations maintaining or increasing sustainability spend (MIT 2025). Scope 3 tracking is now operational.

60 seconds vs 12 weeks — the same insight at a fraction of the cost

Alternative	Cost	Time to Insight	Live Data	Always On
McKinsey / Big 4	\$150K–\$500K	8–12 weeks	No	No
Gartner Membership	\$25K–\$60K/yr	Weeks	No	No
Internal Team	\$30K–\$80K	4–8 weeks	No	No
ASCM Free Tool	\$0	1 hour	No	No
SC Health Agent	Contact for pricing	60 seconds	Yes ✓	Yes ✓

02 — The Platform

What it does, how it works, and what makes it agentic

Nine capabilities — diagnostics, intelligence, geopolitical risk, and autonomous action

Instant Diagnostics

Scores 8 domains 0–100 vs 2026 Gartner and SCOR benchmarks — cited inline

North Star Framing

Your 2-year excellence vision frames every recommendation — not generic advice

Live Market Intelligence

Autonomously searches freight rates, regulatory updates, geopolitical risks

Geopolitical Risk Scoring

China/rare-earth exposure and nearshore vs reshore strategy — explicitly scored

Cyber Resilience Sub-score

Named sub-dimension within Risk — AI-enabled attacks and digital vulnerabilities

Auto Action Pack

Generates board summary, 90-day plan and risk watch list — automatically

Context-Aware Q&A

Follow-up answers reference your specific scores — not generic advice

Professional PDF Export

Multi-page report with scores, narrative, recommendations — board-ready

Phase 2 Risk Alerts

Proactive monitoring via Claude + web search, delivered to Slack and email

Built on McKinsey REWIRED — four principles applied to supply chain diagnostics

Tie every output to business value

Benchmark transparency — every score cites its world-class standard and gap inline. No number without context.

Free tier

North Star vision before roadmap

New opening intake question: 'What does supply chain excellence look like for your org in 2 years?' Frames every recommendation.

Free tier

Sequenced 3-horizon roadmap

Pro-tier Action Pack upgrade: Quick wins (0–90 days) → Operational shifts (90 days–12 months) → Strategic transformation (12–36 months).

Pro tier

Financial impact of every gap

Dollar cost of each SCOR domain gap sized against your revenue and COGS. Makes the case for investment in the board language.

Pro tier

Agentic AI — Claude works autonomously, without waiting to be asked

LIVE NOW

North Star Intake

- 2-year vision question frames all recommendations against your goals

Live Web Search

- fetches freight rates, regulations, geopolitical risks during every assessment

Geopolitical Scoring

- China/rare-earth exposure and sourcing footprint strategy explicitly scored

Cyber Resilience

- named sub-dimension of Risk, referencing 2026 AI-enabled attack vectors

Auto Action Pack

- board summary, 90-day plan and risk watch list, no prompt required

PHASE 2 — BUILT & READY

Cross-Session Memory

- SQLite engine tracks org profiles, scores and KPI trends over time

Proactive Risk Alerts

- Claude monitors supply chain news and flags risks before you ask

Slack + Email

- push assessments, action plans and alerts to channels

Jira Integration

- create tickets from the 90-day action plan automatically

Eight SCOR-aligned domains — scored 0–100 against 2026 world-class benchmarks

Demand Planning & Forecasting

2026 world-class:
FA >85–90%, MAPE <10%

Procurement & Sourcing

2026 world-class:
OTD >95%, <500 PPM +
nearshoring strategy

Manufacturing & Production

2026 world-class:
OEE >85%, FPY >98%

Inventory Management

2026 world-class:
8–12x turns, <1% stockout

Logistics & Transportation

2026 world-class:
OTIF 95–98% (capacity
crunch aware)

Warehousing & Fulfillment

2026 world-class:
Accuracy >99.9%

Risk & Resilience

2026 world-class:
BCP >95% + cyber resilience
sub-score

Sustainability & ESG

2026 world-class:
Scope 3 >80% tracked,
CSDDD compliant

03 — Who It's For

Five user personas — three live now, two on the roadmap

Five personas — each with a distinct track, from practitioner to federal

SC Manager / Analyst

Practitioner Track

Deep KPI diagnostics, benchmark gaps vs 2026 Gartner Top 25, CBA, North Star framing, Q&A with live web search.

Live Now

CSCO / COO / VP SC

Executive Track

Strategic scenario comparison, 36-month maturity roadmap, board-ready language, geopolitical and cyber risk highlighted.

Live Now

SC Consultant

Consultant Track

Multi-client diagnostics across 11 verticals, white-label PDF reports, client intake forms, benchmark transparency built in.

Live Now

Enterprise IT / Config

Enterprise Track

SSO/SAML, API access, webhook integrations, custom verticals, audit logs, SLA guarantee.

Phase 2

Government / Federal

Federal Track

Air-gapped & GovCloud deployment, FedRAMP pathway, ITAR controls, FIPS 140-2 compliance.

Phase 3

04 — Industry Coverage

11 vertical presets — sector-specific 2026 benchmarks and reference organisations

11 industry verticals — tailored 2026 benchmarks, risk weighting and reference orgs

General Manufacturing

Gartner Top 25

Semiconductor

TSMC, Intel, NVIDIA

Automotive

Toyota, BMW, Tesla

Pharmaceutical

Pfizer, Roche, J&J

Retail & E-commerce

Amazon, Walmart, Zara

Consumer Packaged Goods

P&G, Unilever, Nestlé

Aerospace & Defense

Boeing, Airbus, Lockheed

Healthcare

Medtronic, Stryker, BD

Food & Beverage

Nestlé, Coca-Cola, Tyson

Technology & Electronics

Apple, Samsung, Dell

Apparel & Fashion

Zara, Nike, H&M

05 — How It Works

Three steps from opening a browser to board-ready results

Select · Configure · Assess — under 60 seconds, zero technical setup

1

Select

Choose your persona — Analyst, Executive, Consultant, Enterprise or Federal. Everything adapts from this single choice.

2

Configure & Frame

Pick your industry vertical. Share your North Star 2-year vision, sourcing geography, and org context for a tailored assessment.

3

Assess

Click Run Assessment. Claude searches the web and delivers scores, benchmarks, action pack and market intelligence in under 60 seconds.

Four output tabs — results delivered automatically, no extra prompting required

Diagnostic Report

Domain scores 0–100 with 2026 benchmark citations, cyber resilience sub-score, geopolitical risk flag, priority recommendations.

Auto Action Pack

Board summary (5 bullets for CFO/CEO), prioritised 90-day action plan with named owners, and a top-5 risk watch list.

Market Intelligence

5 real-time supply chain signals — freight conditions, commodity moves, regulatory changes, geopolitical risks.

Q&A

Ask Claude anything. Your North Star vision and sourcing context carry through. Claude searches the web for current data.

The Auto Action Pack — three board-ready outputs, generated without prompting

Board Summary

5 bullets written for CFO/CEO — impact-first, no jargon, ready to paste into a board presentation.

- Overall score and rating vs 2026 world-class
- Top 2 domain gaps with dollar cost estimates
- Priority recommendation with payback timeline
- Recommended strategic scenario
- Single next action

90-Day Action Plan

8–10 specific actions with named owners, success metrics and week-by-week timing.

- Weeks 1–4: foundational quick wins
- Weeks 5–8: process and tool improvements
- Weeks 9–12: capability build and tracking
- Named owner for each action
- Measurable success metric per action

Risk Watch List

Top 5 supply chain risks by severity and likelihood, each with an immediate mitigation action.

- HIGH / MEDIUM / LOW severity rating
- Likelihood assessment
- Immediate mitigation action
- Vertical-specific risks (e.g. rare-earth controls)
- Links to live market intelligence

06 — Open Source vs Hosted

MIT — free forever at the core. Advanced features on the hosted service.

07 — Expected Outcomes

From diagnostic to decision-ready in a single session

Six decision-enabling outputs — everything needed to brief leadership and act

A scored, benchmarked health check

Domain scores 0–100 against 2026 world-class — with benchmark standard cited inline. You know exactly where you stand.

Geopolitical & cyber risk flags

China/rare-earth exposure, sourcing footprint maturity, and cyber resilience — explicitly scored and flagged in every report.

A board-ready executive summary

5 bullets for CFO or CEO. Impact-first, no jargon. Ready to paste into a board presentation.

A prioritised 90-day action plan

Named initiatives, suggested owners, success metrics and week-by-week timing. Framed against your North Star vision.

A risk watch list

Top 5 supply chain risks by severity — geopolitical, cyber, and operational — each with an immediate mitigation action.

Strategic scenarios (C-Suite track)

Three named transformation paths with investment ranges, KPI targets, trade-offs and a recommendation.

08 — Get Started

No installation, no IT ticket — open any browser and go

The supply chain leaders who win are the ones who know their numbers.

Now you can know yours — in 60 seconds. Grounded in 2026 reality.

Try it now
